

The UEV-570 is designed to make family adventures comfortable, convenient, and worry-free. At the heart of its comfort features is the Truma Combi D6 diesel hot water and central heating system, providing instant hot water and efficient interior heating, ensuring a warm and cosy environment no matter the weather or destination. Hot water mixer taps throughout the caravan allow precise temperature control at every point, giving a modern, user-friendly experience.

For added flexibility, a practical external shower is fitted for quick rinses after sandy beach days, muddy hikes, or swimming adventures, keeping the interior clean while providing easy access to water outdoors. Together, these systems ensure the UEV-570 delivers the perfect blend of comfort, hygiene, and off-grid independence, so every adventure is enjoyable and stress-free.
